# Native Bigtooth maples make great addition to Logan City’s Denzil Stewart Nature Park

Twelve Bigtooth maples were donated by the Center for Water Efficient Landscaping and planted at the Denzil Stewart Nature Park on Saturday, October 30th, 2020.

Many volunteers made light work during this collaboration between the Bridgerland Audubon Society and Logan’s Wilson Neighborhood Council.

Logan’s Mayor Daines stopped by to admire them, and Mark Anderson of Anderson Seed & Garden helped dig and donated root stimulator. The riverbank will have a lot of great fall color for many years to come!

Thanks to Hilary Shughart of the Bridgerland Audubon Society for providing the photo.
