

## PESTICIDE AND TOXIC SUBSTANCE ANALYSIS

The pesticide and environmental toxicology programs at Utah State University receive a broad range of inquiries from a variety of sources. One recurring request is the availability of laboratory analysis for the detection of a chemical substance or substances in a sample which could be food, plant material, animal tissue, soil, water, etc. Often the chemical to be analyzed for is a pesticide, animal drug, plant toxin, environmental contaminant, or other toxic substance. Following is a list of those laboratories in Utah and neighboring states that advertise the capability of performing such analyses:

DataChem Laboratories  
960 West LeVoy Drive  
Salt Lake City, UT 84123  
1-801-266-7700 or 1-800-356-9135  
<http://www.datachem.com/>

TestAmerica  
880 Riverside Parkway  
West Sacramento, CA 95605  
1-800-753-4225  
<http://www.testamericainc.com/>

MDS PharmaServices  
621 Rose St.  
PO Box 80837  
Lincoln, NE 68502  
1-402-476-2811  
<http://www.mdsp.com/>

National Testing Laboratories  
6555 Wilson Mills #102  
Cleveland, OH 44143  
1-800-458-3330  
<http://www.ntllabs.com/>

Chemtech-Ford Analytical Laboratories  
6100 S. Stratler  
Murray, UT 84107  
1-801-262-7299  
<http://www.chemtechford.com/>

The Utah Department of Agriculture and Food, 801-538-7168, the Utah Department of Health, 801-584-8400, and the Utah Department of Environmental Quality, 801-536-4400, also provide analytical services but only under certain circumstances, such as the contamination of drinking water, contamination of human food or animal feed, misuse of pesticides or other agricultural chemicals, misbranded or adulterated products offered for sale, environmental accidents and spills, and morbidities and mortalities of man or animals from unknown causes.
