Sept. 2007

2008 COMMODITY INSURANCE FACT SHEET

Fresh Freestone Peaches

Utah

Crop Insured

Growers must insure all their acreage of fresh freestone peaches in a county. The acreage must produce at least 200 lugs per acre (22 pounds/lug) in at least one of the last three years. The orchard must have reached at least the fifth growing season after set out. If the orchard doesn't meet these criteria then the company can inspect and agree in writing to insure.

Counties Available

Fresh Freestone Peaches are insurable in Utah county. Fresh Freestone Peaches in other counties may be insurable by written agreement if specific criteria are met.

Causes of Loss

Adverse Weather Conditions¹ Insects³
Failure of Irrigation Water Supply² Plant Disease³
Fire⁴
Wildlife⁵

¹Natural perils such as hail, frost, freeze, wind, drought, and excess moisture.

²If caused by an insured peril during the insurance period.

³But not damage due to insufficient or improper application of control measures.

⁴Unless weeds and undergrowth are not controlled or unmulched pruning debris is not removed.

⁵Unless wildlife control measures have not been taken.

Insurance Period

Coverage begins for each crop year on November 21. The calendar date for the end of the insurance period for each crop year is September 30.

Important Dates

Sales Closing November 20
Acreage Report Due..... January 15

Coverage Levels & Premium Subsidies

The guarantee is production, measured in lugs of fresh fruit. Individual amounts of insurance are based on a grower's production history. Insurance providers calculate individual approved-average yields from 4-10 years of production records. Growers can select a coverage level ranging from 50-75 percent of their approved average yields and 55-100 percent of a price announced by USDA, or Catastrophic Risk Protection (CAT) based on 50% of their approved yield and 55% of the price.

Price Election Price used to calculate your premium and indemnity: **\$5.55 per lug**

Cost of Crop Insurance

The Agricultural Risk Protection Act of 2000 raised the subsidies for federal crop insurance premiums substantially. For CAT coverage, growers pay an application fee of \$100 with 100 percent of the premiums being subsidized. Higher coverage levels are subsidized at lower rates; USDA pays at least 50 percent of the premium. For more detailed information about the amounts of coverage and premiums, please contact a crop insurance agent.

Loss Example

A claim can be filed whenever production falls short of the guarantee selected by the insured. The amount of a loss is determined by multiplying the production shortfall by the pre-selected price.

Based on average yield of 230 lug/acre, 65% coverage level and one basic unit, 100% share

230	Lugs per acre average yield (APH)
<u>x .65</u>	Coverage level percentage
150	Lugs per acre guarantee
<u>- 100</u>	Lugs per acre actually produced
50	Lugs per acre loss
<u>x \$5.55</u>	Price election
\$277.50	Gross indemnity per acre

Where to Purchase Crop Insurance

All MPCI, including CAT coverage insurance policies are available from private insurance agents. A list of crop insurance agents is available on the RMA website at:
