General

Family:	Pinaceae - Pine
Cultivar Availability:	Yes
Hardiness Zone:	2 - 8
Type:	Conifer
Utah Native:	No

Ornamental

Flowers:	No
Fruit:	No
Foliage:	Yes
Fall Color:	No
Bark:	Yes

Growth

Growth Rate:	Medium
Mature Height:	High
Longevity:	High
Power Lines:	No
Crown Shape:	Pyramidal

Tolerance of...

Shade:	Low
Salt:	Low
Drought:	High
Poor Drainage:	Low
Alkalinity:	Medium
Transplanting:	Medium

Landscape Use

Widely planted in landscapes throughout Utah and the West. I have seen many old, stately trees in Logan, Utah. Needle and upper bark color are very nice. Fairly disease- and insect-free, though it shows some chlorosis (needle yellowing) when planted on our highest pH (most alkaline) soils and when overwatered. Zones 2-8.
