

Crown

Cottonwood, Eastern

Photograph: (c) Michael Kuhns

Photo: the tree browser doesn't have a photo of the Siouland Poplar but it looks very similar to this.

General

Family:	Salicaceae - Willow
Cultivar Availability:	Yes
Hardiness Zone:	2 - 9
Type:	Broadleaf
Utah Native:	No

Growth

Growth Rate:	High
Mature Height:	High
Longevity:	High
Power Lines:	No
Crown Shape:	Oval

Landscape Use

Fast growth rate, disease resistance, and cottonless characteristics. Still, though, like all cottonwoods and poplars is weak-wooded and does not belong near lots of people or valuable property. Great for wind breaks. Zones 2-9.
