

## Water Testing Lab Information

Check the table below for a lab near you. These labs will all accept water samples from you. This is a general checklist of tests provided. Remember only the labs listed on the table will take samples from you.

Check with the lab before you collect water for the test to make sure you have all the necessary information and use the proper collection methods. Send in your sample according to the lab's directions. Before you call the lab, think about what testing you would like to have done, don't assume the lab will know what you want.

Lab Information			Drinking Water Testing				Environmental
Lab Name	Phone Number	City	Inorganics	Bacteria	Metals	Organics and Physical	Tests Environmental Water
Bear River District Health Department Laboratory	(435) 792-6580	Logan		<input checked="" type="checkbox"/>		<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
