Fact Sheet

- Hedging with a Put Option

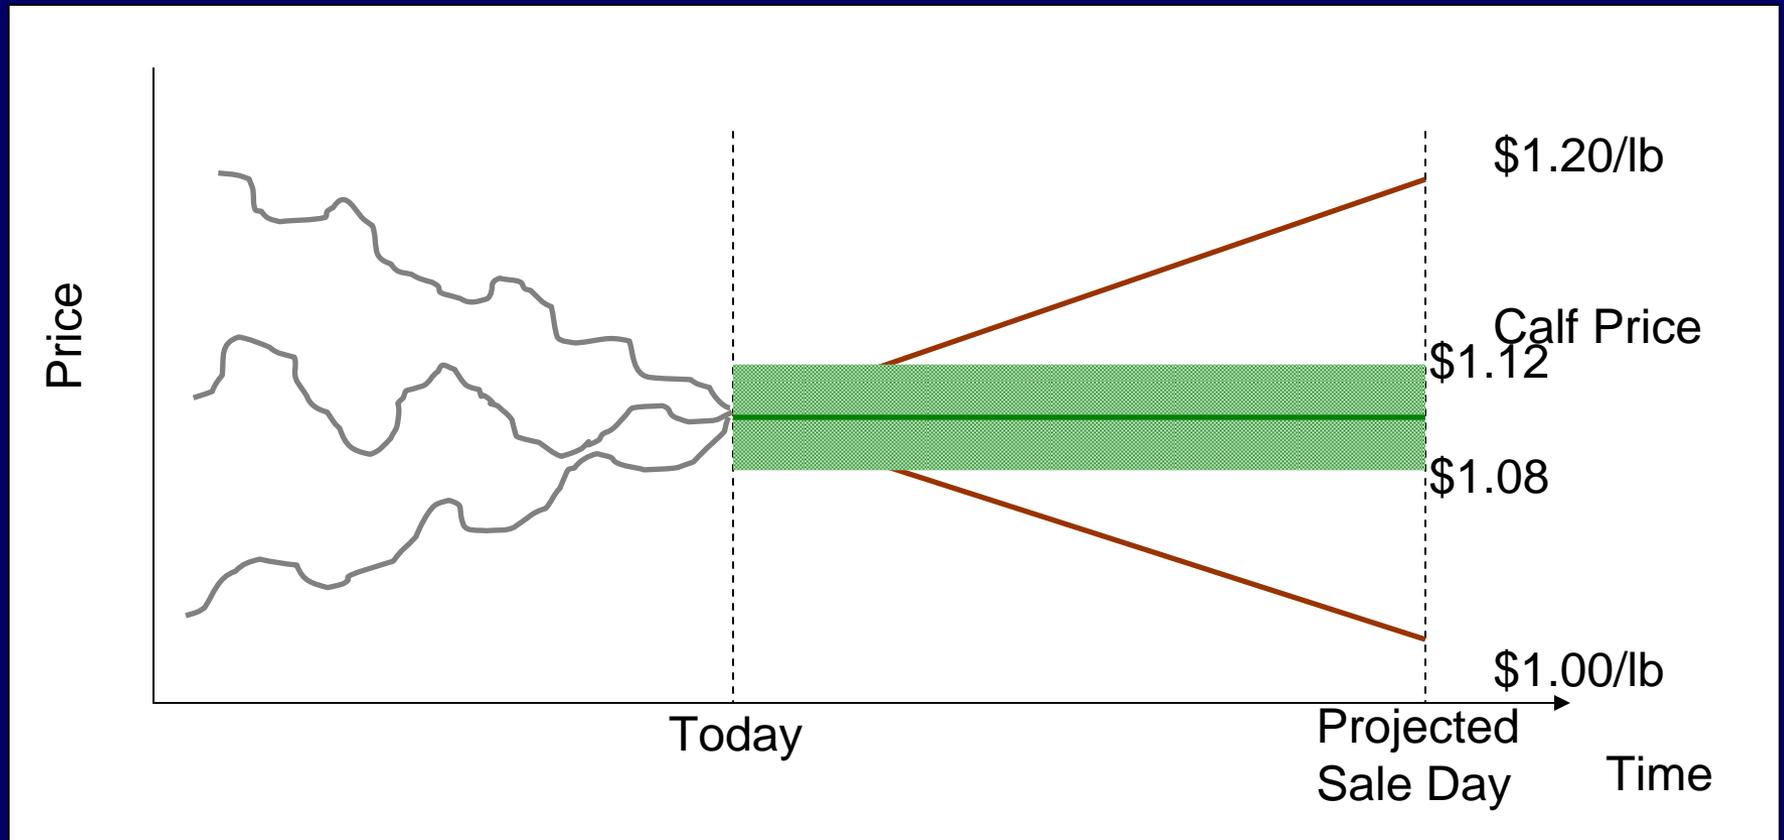

Cash Price Uncertainty

Cash Price Uncertainty Forward Contract

Cash Price Uncertainty Futures Hedge

Market Alternatives

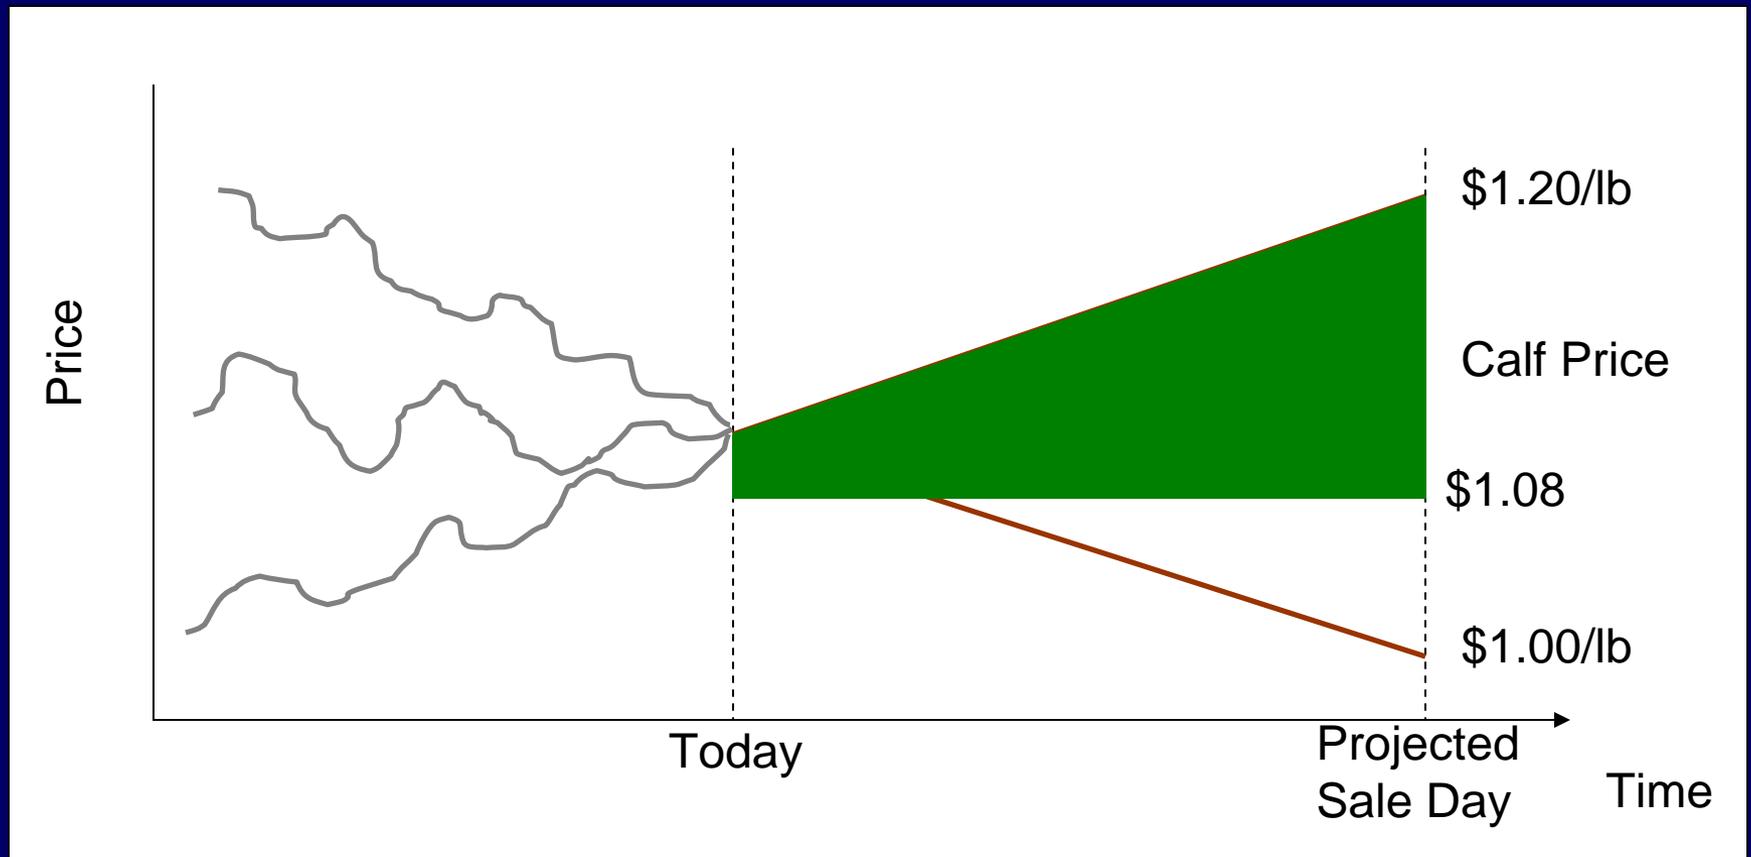

- Cash
 - Exposed to both upside and downside potential
- Forward Contract
 - Fixed price, no price risk
 - Eliminate downside (good) also Eliminate upside (bad)
- Futures Hedge
 - Similar to Forward Contract
 - Basis Risk
 - Still limited upside potential

Put Option

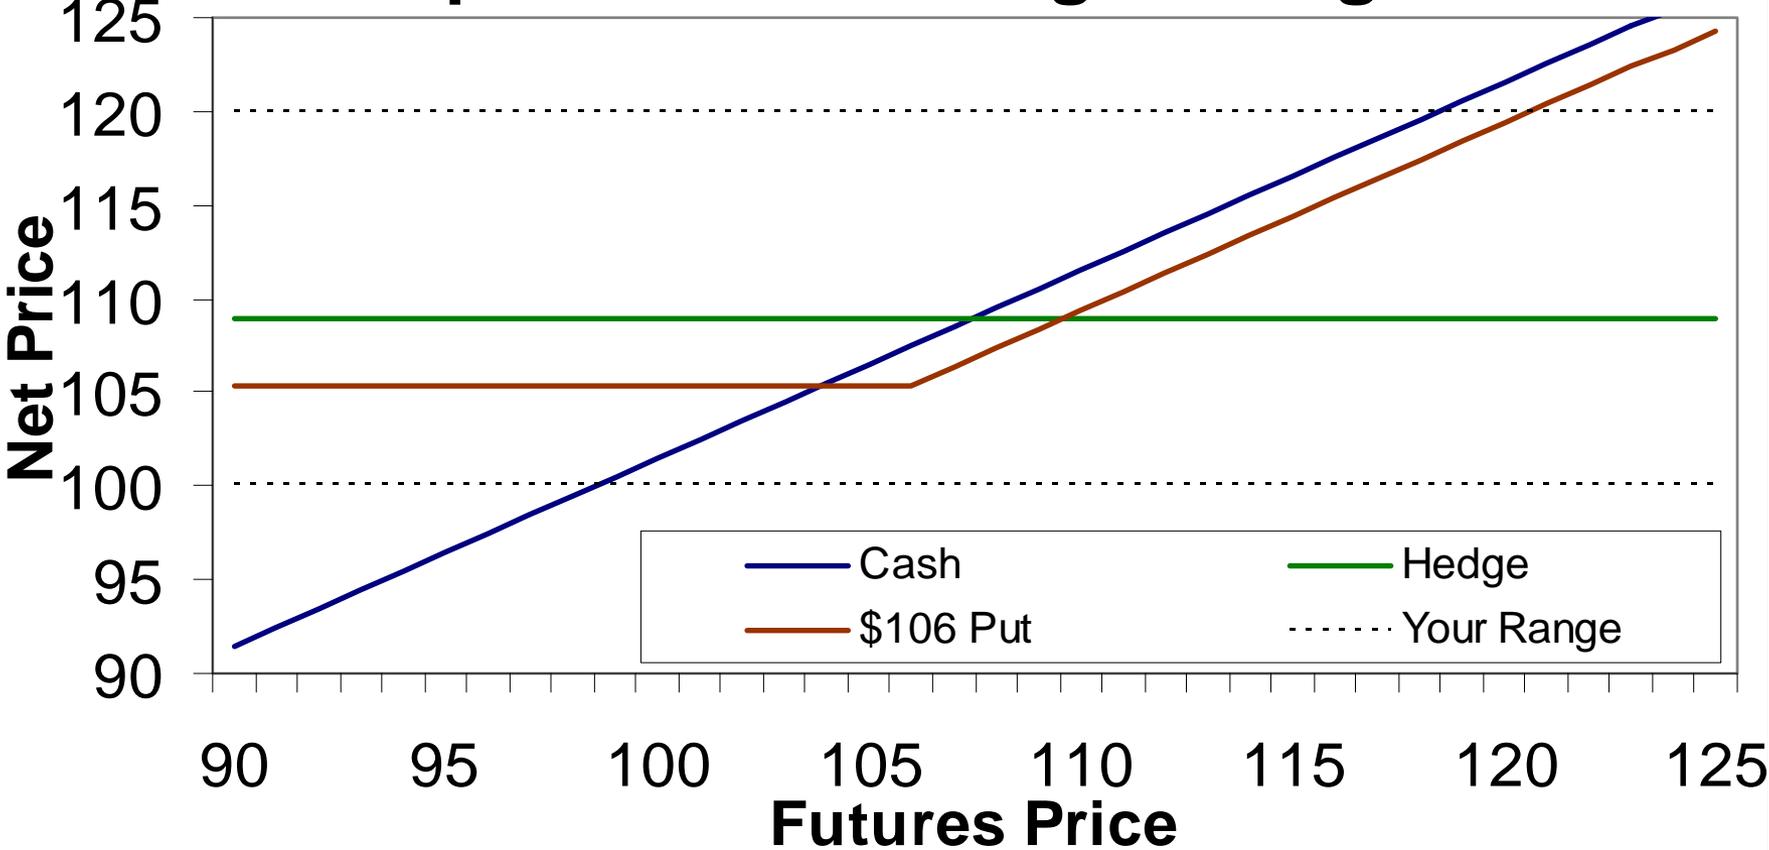

Protect future sales against price decreases

- Eliminate Downside risk
- Take advantage of upside market potential
- There is a cost to do this
 - Option Premium
 - What you are paying to insure against lower prices

Cash Price Uncertainty Put Option

Comparison of Pricing Strategies

The Mechanics of Put Option

- A producer buys a Put to protect against declining prices
- Chooses Strike Price and Pays the premium
- Determines the minimum expected price

Minimum Expected Price Examples

Min Exp Price = Strike Price – Premium +/- Basis

\$107.50 = \$108 - \$2.50 + \$2.00 feeder cattle

\$83.20 = \$88 - \$3.30 - \$1.50 live cattle

\$4.30 = \$5.40 - \$0.40 - \$0.70 wheat

DAY FEEDER CATTLE (Jan 2007)

Quotes generated on: Wed, Sep 13, 2006 4:59 PM CDT

Assume Expected Basis = -\$3.00/cwt for 700 lb steer
 Min Exp Price = \$114 - \$3.45 - \$3.00 = \$107.55
 = \$112 - \$2.65 - \$3.00 = \$106.35
 = \$110 - \$2.05 - \$3.00 = \$104.95

Buying a Put Problem Template

| Date | Cash | Options | Basis |
|---------------------|-------------------------|--|-----------------|
| Initial Date | Exp. Min. Sale Price | Buy Put Pay Premium Price | Exp. Basis |
| End Date | Sell Cash Price | Sell Put collect Premium Let Expire for no value Or Exercise | Actual Basis |
| | | Gain/Loss | |

Net Sale Price = Cash Price +/- Gain/Loss in options

Buying a Put Problem

Jan 2007 FC example

Market Stays same or Moves Higher

| Date | Cash | Options | Basis |
|---------------|-------------------------------|--|-------------------|
| Sep 13 | Exp. Min. \$106.35 | Buy \$112 FC Put Pay \$2.65 | Exp. -\$3.00 |
| Jan 15 | Sell 700 lb Steer \$111 | Jan FC 114 \$112 Put has \$0 value | Actual -\$3.00 |
| | | -\$2.65 | |

Net Sale Price = \$111 - \$2.65 = \$108.35

Buying a Put Problem

Jan 2007 FC example

Market Moves Lower

| Date | Cash | Options | Basis |
|--|-------------------------------|--|-------------------|
| Sep 13 | Exp. Min. \$106.35 | Buy \$112 FC Put Pay \$2.65 | Exp. -\$3.00 |
| Jan 15 | Sell 700 lb Steer \$104 | Jan FC 107 Sell \$112 Put for \$5.00 value | Actual -\$3.00 |
| | | \$2.35 | |
| Net Sale Price = \$104 + \$2.35 = \$106.35 | | | |

Call Option

Protect future purchases against price increases

- Eliminate Upside risk
- Take advantage of downside market potential
- There is a cost to do this
 - Option Premium
 - What you are paying to insure against higher prices

The Mechanics of a Call Option

- A commodity user buys a Call to protect against increasing prices
 - Feedlot using Corn
 - Elevator buying wheat
- Chooses Strike Price and Pays the premium
- Determines the maximum expected price

Maximum Expected Price Examples

Max Exp Price = Strike Price + Premium +/- Basis

\$114.25 = \$110 + \$2.25 + \$2.00 feeder cattle

\$4.80 = \$4.00 + \$0.30 + \$0.50 corn

\$5.20 = \$5.50 + \$0.40 - \$0.70 wheat

In the money At the money

Quotes generated on: Wed, Aug 26, 2009 12:22 PM CDT

Assume Expected Basis = +\$0.45/bu for Corn in Utah

Max Exp Price = \$3.20 + \$0.27 + \$0.45 = \$3.92

= \$3.30 + \$0.20 + \$0.45 = \$3.95

= \$3.40 + \$0.17 + \$0.45 = \$4.02

Buying a Call Problem Template

| Date | Cash | Options | Basis |
|---------------------|--------------------------|---|--------------|
| Initial Date | Exp. Max. Purchase Price | Buy Call Pay Premium Price | Exp. Basis |
| End Date | Buy Cash Commodity Price | Sell Call collect Premium Let Expire for no value Or Exercise | Actual Basis |
| | | Gain/Loss | |

Net Purchase Price = Cash Price -/+ Gain/Loss in options

Buying a Call Problem

Dec Corn 2009 example

Market Stays same or Moves Lower

| Date | Cash | Options | Basis |
|---------------|---------------------|--|-------------------|
| Aug 26 | Exp. Max. \$4.02 | Buy \$3.40 C Call Pay \$0.17 | Exp. +\$0.45 |
| Nov 15 | Buy Corn \$3.75 | Dec C \$3.35 \$3.40 Call has \$0 value | Actual +\$0.45 |
| | | -\$0.17 | |

Net Purchase Price = \$3.75 + \$0.17 = \$3.92

Buying a Call Problem

Dec Corn 2009 example

Market Moves Higher

| Date | Cash | Options | Basis |
|---------------|---------------------|--|-------------------|
| Aug 26 | Exp. Max. \$4.02 | Buy \$3.40 C Call Pay \$0.17 | Exp. +\$0.45 |
| Nov 15 | Buy Corn \$4.25 | Dec C \$3.80 Sell \$3.40 Call for \$0.40 value | Actual +\$0.45 |
| | | +\$0.23 | |

Net Purchase Price = \$4.25 - \$0.23 = \$4.02

Summary

- Put Options can be used to establish a price floor, a minimum price
 - Worst case you lose your premium
 - Can take advantage of higher market prices
- Call Option can be used to establish a price ceiling, a maximum price
 - Worst case you lose your premium
 - Can take advantage of lower market prices
