# Custom Rates Survey Report 2009/2010

Sarah A. Drollette  
Department of Applied Economics  
Utah State University

Many agricultural producers in Utah hire others to perform some custom farm work in order to accomplish all the tasks necessary to ensure success in their agricultural business. Similarly, some farmers also provide custom work for others. The purpose of this report is to provide agricultural producers with current information regarding rates for custom farming operations in Utah.

## Procedure

The custom rates reported in this publication were obtained from surveys distributed at crop schools and sent by mail to 299 farmers, custom operators, agricultural

bankers and other agricultural professionals. The response rate for the survey was 15%. Table 1 summarizes the percent of survey respondents categorized as agricultural producers, custom operators, bankers or other agricultural professionals. In some cases, survey responses were disregarded if it was clear the respondent interpreted the information in a different manner than the majority of the other respondents.

## Reported Rates

The custom rates reported are those charged or paid during 2009. An average rate for all responses is given as well as a range of

the responses including the lowest rate and the highest rate reported. The number of responses for each custom operation is also provided. In most cases, the number of responses was less than ten and for many specific custom operations only one response is reported. More observations would be necessary to perform

further statistical analysis. Because of the low survey response rate, custom rates reported in this publication should be used only as a guide. Actual rates in different areas of the state are likely to vary somewhat due to different field conditions, variations in supply and demand, location and other area-specific variables.

**Table 1. Respondent Information**

	<b>Percent of Respondents*</b>
Agricultural Producer	27%
Custom Operator	27%
Agricultural Producers and Custom Operator	16%
Banker	2%
Custom Operator and Banker	13%
Other	16%

\*Percentages may not be exact due to rounding.
