STEPONE
SERVICE™

a Division of Evergreen Healthcare Partners, LLC

Hospital Based Acute Withdrawal Management

What is it?

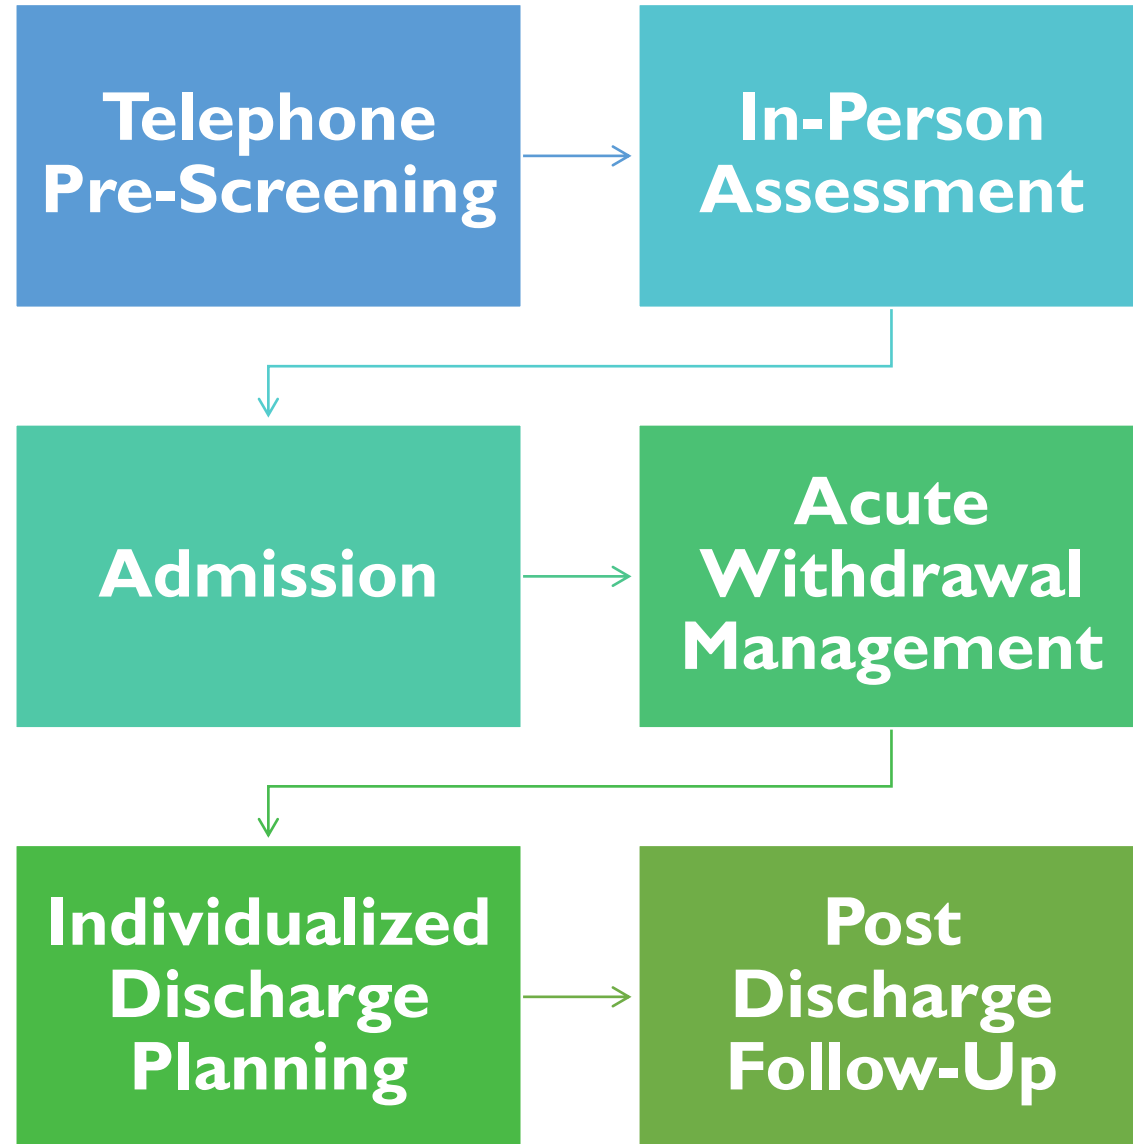

The StepOne Service™ is an inpatient, hospital-based 3 - 5 day Acute Withdrawal Management service available to adults requiring medical management of withdrawal symptoms from alcohol and/or opioids.

- Requires voluntary admission to the hospital
- Provides round-the-clock medical care by the trained hospitalist team & nurses
- Uses protocol-specific medications to reduce the severity of withdrawal symptoms

Who We Treat?

Individuals seeking treatment through the StepOne Service™ must be committed to remaining in the hospital until medically stable and be motivated to continue the treatment process by transitioning to a community-based addiction treatment service once discharged.

The Process

Patient Engagement & Care Coordination

New Hospital Partnerships

EHP's turn-key partnership model includes:

- Implementation
- Clinical education
- Operating systems
- Facility-level/corporate personnel to facilitate delivery and ongoing management of service:
 - Community awareness
 - Quality assurance
 - Dedicated patient engagement/care coordination

New Hospital Partnerships

The typical process:

- Assessment of bed need
- Evaluation of area/regional SUD related resources
- Financial Analysis
- Formal Proposal
