

## Food, Fun, & Reading

PLEASE READ AFTER the Sixth Lesson

(only if parents are attending the class with children)

### Script for NEA to Read

Utah Food Sense would like to ask for your assistance in a Pilot Study of the Food, Fun and Reading program we are teaching today. We are inviting your child to take the post survey to evaluate MyPlate knowledge. In order for your child to participate, we must again obtain your consent through a written consent form. Participate is voluntary. Please read the informed consent form, sign it and turn it back in. If you do not wish for your child to participate in the study, he/she is still welcome to attend the lesson today.

In addition to the Child survey we would like to ask for YOUR help evaluating the program. Please read the informed consent form and sign if you agree to participate in the study. The survey can be filled out in paper form or on online if you have a smart phone with you. Participation is voluntary.

Thank you for your help.

**Note to NEA:** After you give the SIXTH lesson and you receive signed consent forms pass out POST survey to children. Go over the questions as a class and encourage kids to circle each answer. At the same time hand out the parent survey.

If children are too young to answer the questions- you can just encourage them to color on the form. Turn in all PRE surveys at the end of the series. We will go through and pull the ones that are usable. Send to Brittany Bingeman in Washington County Extension.

If a parent refuses to have their child participate in the study- hand out the color sheet that is the pilot study materials. Ask child to color it while other children fill out the survey. In addition to printing off post-surveys print some color sheets off and have available in case you may need some.
