

Growing Through a Summer Internship

This summer, I had the opportunity to be the Ag intern at the Juab County Extension Office. Throughout my internship, I was able to gain valuable work experience while participating in a variety of programs and activities that benefit the community.

One of the biggest parts of my internship was helping with 4-H activities. I assisted with programs such as Summer in the Park and day camp. These activities gave me the opportunity to work with youth, help organize activities, and see firsthand how 4-H provides fun and educational experiences for kids throughout the summer.

I also had the opportunity to help with a fodder research project. Being involved in this project allowed me to learn more about agriculture and research while gaining hands-on experience.

Another highlight of my internship was helping with the Juab County Fair. I was able to assist with the many activities that go into making the fair successful. The experience gave me a better appreciation for the planning, organization, and teamwork required to put on a community event.

Overall, my summer internship at the Juab County Extension Office was a great learning experience. I gained skills in working with youth, agriculture, research, organization, and community events. I am grateful for the opportunity to be involved with the Extension Office and to contribute to programs that make a difference in Juab County.

This internship gave me experiences that I will be able to carry with me in the future, and I am thankful to everyone at the Juab County Extension Office who helped make my summer a memorable and educational one.
