

Juab Community Garden

By Judy Jensen, 4-H Staff Assistant

Now is the time to begin planning for the upcoming gardening season. Vegetable gardening is a hobby for many people in Utah. Working in a garden reduces stress and we can eat healthier by eating what we have grown. Start browsing gardening catalogs that are showing up in the mail. Some popular seed catalogs include Burpee, Gurneys, Wayside Gardens, and sometimes even Amazon. Now is a good time to order seeds because companies can run out.

The younger generation are purchasing town homes or condos which do not have the space for traditional backyard gardens. Nephi has a community garden which is available to members of the community.

The Juab County community garden is located on the north end of the fairgrounds. It provides the opportunity for residents who do not have adequate space to enjoy gardening. We have 20 plots that are forty square feet each which are available to grow your own vegetable garden. These plots are filled on a first come first served basis. There is a small registration fee required that goes toward the upkeep of the garden. A small refund is given when the box, around the box, and the weeds are hauled off. If you are interested contact the Extension office @623-3450. Once you are on the list, we will reach out to you with the Community Garden open date.
