

Plant Pest Diagnostic Training

Please complete this evaluation for the plant pest diagnostic training on Feb. 17, 2006.

1. Did you attend this training to receive CEU's for a pesticide applicator license? If so, which type of license do you hold?
 - A. Commercial
 - B. Noncommercial
 - C. Private
2. When customers have plant disease or pest problems do you feel confident that you possess the knowledge to answer questions, or have reference material available that will aid you in your diagnosis?
3. Do you feel the diagnostic manual you received with this training will be of value to you?
4. Are there reference materials that you would like to see your business invest in. If so what?
5. In the past, have you used the USU Extension Service (County Extension Office) or Plant Diagnostic Clinic to help diagnose problems?
6. Have you or will you arrange for employee training for seasonal and part time employees in your business? Has today's workshop helped you to be able to better train new employees?
9. After this training, do you feel confident in discussing alternative methods of pest control, other than traditional pesticides, with clients?
10. Will you post or provide plant pest management information provided by USU Extension for customers in your store (such as fact sheets, Garden Utah! publication, etc.)?
