Comments:

It would be helpful to have an information sheet that tells you where to go on the internet to find information.

Having three instructors (Jerry, JayDee, Richard) has given us in-depth information in their areas of expertise as well as expanding areas with more details from their experiences and putting it on a level that we can identify with.

Our assigned "print at home" was very beneficial to be able to find sites on the internet and review the subject. Now I have information at hand at home.

It was nice to have JayDee, Jerry, and Richard teach us when the subject was more their specialty. They could also add knowledge when another person was giving the presentation.

I liked the interchange among the instructors/students and how freely we could ask questions or add to the discussion.

I'd love to have more varieties of classes besides this diagnostic class. I took the Landscape Design with Larry Sagers last fall. I would love more.

Great class!! Terrific instructors!! Can they be on a CD with lectures?

I have enjoyed the class immensely. I've learned a lot and reviewed things I had previously studied. Thanks so much for sharing your time, talents, and knowledge.

I thought it was helpful to look up the website and find the fact sheets. I was then able to print them off and read them.

JayDee has been awesome and very very helpful. His sense of humor makes the class entertaining and fun as well.

There are a lot of professionals who have given input that has been very helpful as well.

The program is excellent!

I have been amazed at the handouts, books and other items that they made available to us. Wonderful class!

Best Master Gardener Class ever!!

I would like more hands on field trip diagnosing and plant identification.

Have a printed list of fact sheets so we can print them before class.

Having Power Point notes is easier. You can pay more attention instead of trying to write it all down.

I enjoyed all of the different teachers and the points they brought to the specific subjects.

Fun and informative.

Great visuals.

Personable – answered questions.

Touch of honest humor enlivened class presentations.

Loved the hands-on concept. We saw actual plant samples – much better than diagrams, etc. Instructors are very personable, friendly, and non-threatening.

Loved the class!!

The classification keys are really helpful. That was a lot of work to compile. Thanks for the effort!

All the details that you add to what you have found personally are great. Those details are usually exceptionally helpful and very common sense. Explaining the scientific terms on a simple level helps us as well.

Keep the hands on identification. It really takes some of the fear out of trying to do it. It helps cement it in the brain. We got more books and information than we paid for the class. Well worth the cost.

The best class I've attended so far!
