

Salt Cedar Leaf Beetle follow-up survey

We would appreciate it if you would take a few minutes to fill out this follow-up survey and return it in the postage paid envelope. We are trying to collect information regarding any collection of the Salt Cedar Leaf Beetle from the original release site, and where they were dispersed onto Private lands. Your responses will help us create a state wide map of distribution sites.

Thank You for Your Assistance.

Did you attend the tour of the release site? Yes No

Did you return at a later time to collect insects? Yes No

If "Yes", Did you collect mostly larvae or adults? Larvae Adults

Approximate day of collection: _____

Could you estimate the numbers of insects collected? _____

What collection procedures did you use? _____

What distribution procedures did you use? _____

What worked well and what didn't work in your collection and distribution process? _____

To create a map of where the insects have been dispersed, we would like to know the GPS coordinates of any release sites this year or in years past. If you don't have GPS data then if you could attach a map with the location pinpointed, or give us a detail description (eg. On the Sevier River approximately 2 miles NE of Delta about 1/2 mile downstream from where hwy 6 crosses the Sevier) If you have the GPS location of where they were released and could provide that it would be great. We would also like an estimate of how many insects you released at each site. Feel free to use the back if necessary.

(Example)

GPSDatum: WGS-84 North: 32°18.6000 West: 109°03.0000 #Released: 1000

GPS Datum: _____ North: _____ West: _____ #Released: _____

GPS Datum: _____ North: _____ West: _____ #Released: _____

GPS Datum: _____ North: _____ West: _____ #Released: _____

GPS Datum: _____ North: _____ West: _____ #Released: _____
