	Santaquin	May 25	June 6	May 27
	West Mountain	May 22	June 2	May 24
Weber	Pleasant View	May 21	June 1	May 23
Wasatch	Heber City	June 4	June 15	June 6
Wayne	Torrey	May 18	May 30	May 21

Choose either Option A or B when starting your codling moth sprays:

Option A uses horticultural oil (1%) as the first spray, followed by a regular insecticide at a later date. The oil kills eggs that have been laid on fruit up to that point. Good coverage of the oil (to dripping) is very important.

Option B is uses regular insecticide at the recommended date. Repeat at intervals until this advisory provides the end date for generation 1.
