

## August, 2004

### **INSECTICIDES**

- ALLETHRIN (allethrin) [pyrethroid]—EPA has proposed to revoke all residue tolerances for this product. Comments must be received by 9-7-04.
- ARMOR (cyromazine) [chitin synthesis inhibitor]—Syngenta—Deleted from their label the statement “Do not apply Armor treated compost to land on which food crops are grown.”

### **MITICIDES**

- SANMITE (pyridaben) [unclassified]—BASF—Proposed to EPA to extend time limited residue tolerances on apricots and cherries until 12-31-06. Comments must be received by 9-7-04.

### **FUNGICIDES**

- PENBOTEC EC (pyrimethanil) [pyrimidine]—Janssen Pharmaceutica—A new fungicide being developed to use as a post harvest treatment on pome fruits.
