

## September, 2004

### **INSECTICIDES**

- AVAUNT (indoxacarb) [oxadiazine]—DuPont—The pre-harvest interval (PHI) on apples has been changed to 14 days from 28 days.

### **MITICIDES**

- PITON (acequinocyl) [unclassified]—Arvesta Corp—EPA established residue tolerances on pome fruit at 0.4 ppm, wet apple pomace at 1 ppm.
- PREV-AM (orange oil/borax/surfactants) [botanical/elemental]—Oro Agri Inc—A new organic miticide/insecticide/fungicide being developed for use on fruit and nut trees. Controls mites, aphids, thrips, powdery mildew, downy mildew, botrytis, and others.
