

## Wednesday, Jan 24<sup>th</sup> Tour

<https://www.sheepdiscoverycenter.com/>

We will take a bus from Spanish Fork Fair Grounds and head to Nephi where Jordan Atkinson and others will explain how their Feed Kitchen, automated Feed Conveyors, and Fodder (sprouted barley) improve the health and productivity of the ewes and lambs.

## SurePoint QuickDraw: Spray Tender System

<https://www.surepointag.com/quickdraw>

After the Sheep Discovery Center we will meet at the Juab County Fairgrounds Multi Purpose Building and have a demonstration by Bryan Gran with SurePoint Ag.

Manually calculating product amounts is a thing of the past! Simply enter acres or total gallons, sprayer application rate, and chemical rate per acre. QuickDraw then calculates the amount of each chemical in the batch, including manually added chemicals.

## Smart Apply: Intelligent Spray Control System

<https://smartapply.com/precision-spraying/>

Ryan Kuch is planning a spring field day in May to demo this system. We will have information available at the fairgrounds to learn more about this technology.

Lunch – provided by IFA
