As of the above date, the pesticides listed have been approved for use by the Salt Lake City School District. All pesticides must be purchased, stored, handled and applied by trained District personnel. All pesticides with a toxicity class of III or less can only be applied by District personnel who have a current license as a Non-Commercial Applicator issued by the State of Utah in the applicable pesticide applicator category. Quantities On Hand are approximate as of the date shown on this document. Safety Data Sheets for all products are filed in Appendix C. Additional copies are available to all employees.
