State of Utah  
Governor's Public Lands Policy Coordination Office

2009

State of Utah Control No. 080720  
Utah State University Control No. 080300

**UtahState**University  
COOPERATIVE EXTENSION

# ACKNOWLEDGMENTS

---

This document is a revision of *Rangeland Resources of Utah*, which was published by the Utah State University Cooperative Extension Service in 1989. Although the emphasis of this document is on rangeland resources, it presents a broad overview of the physical, biological, and social features in Utah, as well as detailed information on land ownership, land use, current issues, and discernable trends. This document is intended to be useful in the formulation of natural resource policy and in decision-making for Utah rangelands.

Information for this document was compiled by a team of researchers and professionals at Utah State University from the Cooperative Extension Service, the colleges of Natural Resources and Agriculture, and the Remote Sensing/Geographic Information Systems Laboratory. The project entitled *Setting the Stage for a Livestock Grazing Policy in Utah* was accomplished under the terms of Contract Number 080720 with the State of Utah Public Lands Policy Coordination Office.

Much of the direction and coordination of this publication was carried out by Ellie Leydsman McGinty, a graduate student in the Bioregional Planning Program and research technician at Utah State University. Her outstanding skills in design, cartography, and layout, and her untiring commitment and dedication to producing a high-quality, informative product deserve our highest praise, respect, and gratitude. Special thanks are due to the authors and contributors who provided their expertise in writing the various sections of the revision.

Special thanks and recognition are due to Kendall L. Johnson, the editor and director of the original *Rangeland Resources of Utah*, and to the original authors who contributed to that effort. Appreciation is expressed to Utah State University Cooperative Extension Service for providing the digital home of the 2009 revision of *Rangeland Resources of Utah* on the Utah State University Extension Website. Special thanks is also due to the technical editors in Extension Marketing and Communications, Donna Falkenborg, Julene Reese, and Lisa Woodworth, as well as Tracy Jones in the Department of Environment and Society in the College of Natural Resources.

Last, special thanks are offered to State Senator Dennis E. Stowell, from Senate District 28, and the Public Land Policy Coordination Office for supporting this effort.

Roger E. Banner  
Extension Rangeland Specialist and Project Co-Director  
Department of Wildland Resources

Ben D. Baldwin  
Project Co-Director  
Department of Environment and Society

# TABLE OF CONTENTS
