

Fall 2021

10/01/2021

Fall 2021

This newsletter features our newest publication, an open-access article in Sustainability and Climate Change exploring life paths to leading systems level change. We also share insights into the Logan and Moab editions of Utah Climate Week, postponement of the joint National Extension Energy Summit and National Sustainability Summit, our Community Agriculture Fact Sheet, and Extension Foundation's new registry. Thank you for helping lead positive change in Utah and beyond.
