

# Spring 2016

05/19/2016

## Spring 2016

With wildflowers at their peak, there is no denying that spring is here. Many of us turn to gardening this time of year, so most of the stories in this newsletter focus on just that. We also feature Extension Associate Professor Paul Hill in this newsletter, including what sustainability means to him and his thoughts on why sustainable living is important. For daily sustainability tips and inspiration, "like" us on Facebook. Happy planting!
