

Summer 2017

07/18/2017

Summer 2017

The heat is on as we experience above-average temperatures across Utah. In the midst of this heatwave, our latest USU Extension Sustainability newsletter highlights Southwest climate change information and training tools. Learn how to prepare for hotter, drier weather ahead, gain a baseline understanding of the science behind climate change, and identify various credible resources for climate change information linked below. For daily sustainability tips and inspiration, "like" and "follow" us on Facebook or our other forms of social media linked on our website. Try to stay cool during the dog days of summer!
