## Winter 2019

This year, we (Drs. Roslynn Brain McCann and Edwin Stafford) revisited the concept of "Inconvenient Youth" as we taught and surveyed teens across three counties in Utah and now southern Idaho about air quality and action steps that can be taken to improve it. This newsletter features publications and news coverage from our 2019 Utah High School Clean Air Poster Contest. Read about the contest impact, view the 2019 and previous years' winning posters, and discover tips to become part of Utah's clean air solution in this winter newsletter.
