

WORLD OF WORK
INTERVIEW CONTEST

UTAH 4-H

Job Title: Entry-Level Software Engineer

Location: Salt Lake City, Utah or Remote

Job Type: Full-Time

Experience Level: Entry-Level (0–2 years)

About the Role

We are seeking a motivated and detail-oriented Entry-Level Software Engineer to join our development team. In this role, you will work closely with experienced engineers to design, develop, test, and maintain software applications. This is an excellent opportunity for recent graduates or early-career professionals looking to build strong technical skills in a collaborative environment.

Key Responsibilities

- Assist in the design, development, and implementation of software applications
- Write clean, efficient, and maintainable code following best practices
- Participate in code reviews and team meetings
- Debug and troubleshoot software issues
- Collaborate with cross-functional teams including designers, product managers, and QA testers
- Contribute to documentation and technical specifications
- Stay up to date with emerging technologies and industry trends

Required Qualifications

- Bachelor's degree in Computer Science, Software Engineering, or a related field (or equivalent experience)
- Basic knowledge of at least one programming language (e.g., Python, Java, JavaScript)
- Familiarity with software development concepts (e.g., object-oriented programming, data structures)
- Strong problem-solving and analytical skills
- Good communication and teamwork abilities

Preferred Qualifications

- Internship or project experience in software development
- Familiarity with web development frameworks or tools
- Basic understanding of databases
- Exposure to Agile or Scrum methodologies

What We Offer

- Competitive salary and benefits package
- Opportunities for mentorship and career growth
- Collaborative and supportive team environment
- Ongoing training and professional development

*Contestants may assume they have met the qualifications highlighted in green when preparing their application materials. All other components should be based on their actual experiences and skills.
