

CCLWG Meeting
May 11th 2005
10:00 am – 12:00 pm
US Forest Service Building, Panguitch

Members Present:

Adam Bronson, UDWR
Nicki Frey, USU EXT
Lisa Church, BLM

Information Presented

Adam- just about finished for lek counts. Every where is doing great. The numbers are high. Counted 97 in Sage Hollow focus area. Probably put more into grouse counts now, so that might explain elevated numbers.

Hunting section in plan – emailed Dean about archived upland game proclamation to find when the last year of hunting was and bag limit. Still waiting for that information.

Alton project – try trapping again when the young are out and about. Probably late June.

Actions Taken

Review of MOU edits suggested and implemented

MOU signed and turned in by Monument, BLM.

Reviewed section 1 and 2

Review the boundary of dog-valley between SWD and CC. There is an overlap between the maps that I have. See c:\agis-stuff\CCARM area.

Discussed and planned study to collect pre-implementation data for brush-hog and hand-thinning treatments to occur in Alton Sink Valley

Follow-up Needed

Field trip to check out the BLM treated sites. Determine if seeding or follow-up treatment needed to improve land recovery.

Nicki – find a date for safe trapping from Renee and Dave

-- email updated MOU to Adam and send an altered version to Jeff (SWARM); request that it be mailed back to me.

-- Section 2.6.3 socio-economic considerations. Lisa will write a blurb about mining on BLM land

Next Meeting: July 13th, 10am, USFS office.
