

**Nicki Frey** graduated West Virginia University with a BS Degree in Wildlife Management in 1996. In 2001, she obtained her Master's degree in Wildlife Biology at Utah State University, working on the effects of predator removal on ring-necked pheasant recruitment. Nicki completed her PhD in Wildlife Biology at Utah State University in September 2004 where she conducted research on the interactions between red foxes, raccoons, striped skunks, their use of a corridor environment, and the effects of management on predator populations. Nicki began working for USU Extension and Jack H. Berryman Institute in October 2004, to focus on solving wildlife management issues in southern Utah as the Assistant Extension Wildlife Specialist. She teaches Principles of Natural Resource Management at Southern Utah University, is involved with 4-H, at the national and state level for the Wildlife Habitat Evaluation Program, and serves as the Continuing Education Coordinator for the Jack H. Berryman Institute. In this role, she consults with Wildlife Service employees concerning Wildlife Biologist certification as well as providing them with academic opportunities.
