

Call, M.W. and C. Maser. 1985. Wildlife habitats in managed rangelands--the great basin of southeastern Oregon: Sage grouse. Gen. Tech. Rep. PNW-GTR-187. Portland, OR: U.S. Department of Agriculture, Forest Service, Pacific Northwest Research Station.

Decreases in sage grouse followed the decrease in sagebrush. Other factors, such as unfavorable weather conditions at hatching time and increased predation, hunting, and disease have each been important at various times in localized areas but are probably not the most important factors in the overall downward trend.
