February

- Consider adding a smaller structure such as a low tunnel or a larger high tunnel to extend your growing season.
- Consider growing herbs and/or microgreens indoors to add fresh greens to your diet.
- Try your hand at starting vegetables or annual seeds indoors from seed to get a jump start on the growing season.
- If storing bulbs, check the bulb's condition to ensure they are firm, removing any soft or rotten bulbs.
- Prune grapes and fruit trees in late February – early March.
- Fertilize fruit trees at least 6 weeks before they bloom.

Pests and Problems:
- Monitor for deer and rodent damage in the landscape.
- Avoid fungus gnat infestations in house plants by allowing the soil to dry out in between watering.
